Subject: RE: WA167 - pretreatment list
Attachments: FY17-18 Wish List - Pretreatment Final List.6-14-17.xlsx

Hi Amelia,

The attached spreadsheet contains a list of PCI/PCAs that were required for this fiscal year based on 106 Work plan criteria in the tab labelled "Master List". I filter out the facilities that are assigned to the current contract, leaving the facilities that could potentially be supported under WA167.

We do not have enough funding remaining in WA167 to support all the pretreatment PCI/PCAs on the list. Please let me know which of these facilities have high priority or if you would like to add other facilities. Based on some rough calculations, we could support up to 10-12 PCI/PCAs.

Thanks,

-Gil Vazquez, P.E.

Gil – Amelia will be around today....but out of office next week. So, IF POSSIBLE, share with her the list of RB requests for pretreatment inspections. She can provide feedback today.

Thanks much.

I agree. I have already discussed the issues with Afrooz. I'll see if I can get a hold of Diana.

Thanks,

Gil

Thanks. As you know there are several contracts to help CA NPDES and components therein. As well as final deadlines == PoP for each. I think the WA 1-67 and NPDES Supplemental are the primary ones to be conversant.

Hi Peter,

I will try to bring my supervisors up to speed before today's meeting.

Thanks,

Dan – thanks this list is helpful to understand the crux of the matter.....how many or 16% percent of Technical Directive will kickoff in May 2018. Let us remember that we who are familiar with such details of each contract and technical directive are able to converse easily about these matters.

Others – managers may need more general info at start to help get general understanding. That is, let's be sure to start off each conversation with overview information. I can recall being a team leader and I was often led down into the weeds very quickly by staff colleagues, although I was still trying to catch up to the bigger issue.

Gil has the task of communicating up to his mgmt.. chain about the various contracts. He can spend more time letting them ask Qs and helping them understand the intricacies. We may get there on today's call but let's be sure to start with overview info.

I intend on starting today's call with overview of each CA NPDES contract and its components. Then I will try to present the crux of the matter.....not enough time to complete permits before end of PoP and insufficient burn rate could exacerbate the possible extension of PoP and this is unique to HQ OWM contract.

More to come. Look fwd to talking with you at 10:30am.

Hello Gil and Peter,

As discussed during our call yesterday, I've attached our list of permits under WA167. The permits highlighted red have the potential to go past June 2018. Permits that we currently expect the RBs will request swaps for have been highlighted purple. We can use this file to determine permits to swap to other task orders, if necessary. We look forward to discussing this with you next week.

Thank you,
